December 4, 2017

Dear County Commissioners and Friends of MU Extension:

For much of the past year, MU Extension was focused on a long-overdue assessment of statewide needs and a deep look at how we respond to these needs with programs and resources.

We crisscrossed the state to gather input from 42 community conversations with 1,200 people and reviewed analysis and recommendations from a range of external experts. As a result, MU Extension is working on a variety of changes in the interest of providing better university engagement with your communities.

We are steadfast in our resolve to help local communities and the state meet grand challenges associated with economic opportunity, educational excellence and healthy futures. These challenges reflect what Missourians from every corner of the state told us they were most concerned about.

As you read your county's annual MU Extension report, I believe you will be pleased to see the results that have been accomplished through county-based University of Missouri faculty. These faculty members work in response to input received from local extension councils.

At the state level, local MU Extension efforts really add up. Though we have long known extension funds were leveraged, an independent review revealed that MU Extension created more than \$945 million dollars of public value from the \$80 million it received from federal, state, county, grant and contract partners. A public value ratio exceeding 11:1 even surprised us.

As we go about implementing changes based on the recently completed needs assessment and review of our organization, I am confident that our ability to create value at the local level will be even greater.

I encourage you to read the attached annual report from your MU Extension county center to gain an understanding of how MU Extension has worked this past year to serve your community.

Your support of MU Extension and your efforts in your community is greatly appreciated. As always, I welcome input on how the University of Missouri can better serve your community and its people.

Sincerely,

Marshall Stewart, Ed.D.

Vice Chancellor for Extension and Engagement

ch

January 24, 2018

Dear Andrew County Constituents,

This document contains information about our existence in the county and our ability to provide relevant, reliable and responsive information to the public. Our office is staffed with an office manager, one part-time extension associate and one full-time extension specialist. The work represented in this annual report may only be a partial listing of the total educational programming that goes on in the county. Therefore, we take pride in knowing that this is just a sample of the outstanding work generated within the county by extension personnel. From their efforts, citizens of the county learn to be effective with managing time, money and resources while achieving their goals. Workshop participants gain knowledge in health, nutrition, communication, family dynamics, agriculture, our environment and youth enrichment activities that will enhance their lifelong well-being as an individual and as a productive citizen in society.

Understanding that today's economy has placed burdens on the public through fewer jobs, fewer discretionary dollars and rising costs to maintain the lifestyle of recent times, University of Missouri Extension has helped the way for citizens to remain the primary focus of their intentions by delivering crucial information in programs that build jobs within the community, conserve energy in businesses and homes and create economic wealth through estate planning and financial savvy class exercises.

With this in mind, we hope that you enjoy reading of the wonderful opportunities presented this past year. A huge thank you goes out to the Andrew County Commission, Andrew County Extension Council and all the businesses and individuals that contributed to our programming efforts throughout the area.

Sincerely,

Ashley Lyle

Sam Carneal

#### **Andrew County Extension Council Duties**

The Andrew County University of Missouri Extension Council serves as the governing body of the county extension program. The council has four purposes assigned by law:

- make recommendations and suggestions to the University concerning the extension program
- make recommendations to the University concerning the appointment or removal of extension personnel
- arrange for and administer the county's share of the cost of the extension services over which the council has jurisdiction, and
- receive, hold or sell real and personal property reasonably required for the extension program.

Andrew County 4-H
Creating opportunities for positive youth development

Cindy Wells Youth Specialist

Devan Rolofson 4-H Youth Program Associate

(1) (1) (1) (1) (1) (1) (1) (1) (1) (1)			1111
Number of Topic Andrew County Learners	What Did They Learn?	What Action Did Participants Take or How Did They Benefit?	How Does This Work Make Andrew County and Missouri Better?
43 4-H members  20 plus volunteers  4-H youth are equipped with the knowledge, skills, attitudes and health for the 21st century workforce. 4-H youth are engaged in programs anchored in science.	Andrew County 4-H serves youth through 3 organized clubs, school enrichment, camps and more. Andrew County 4-H clubs offer long-term educational experiences in which members learn life skills such as decision making, public speaking and working with others. Members learn by doing under the guidance of adult volunteers. The youth of Andrew County have demonstrated advanced learning through shooting sports contest and activities, 4-H Summer Camp, showing livestock or a wide array of other projects and activities throughout the 4-H year.	4-H project work and related educational experiences help youth explore interests from animal science to entrepreneurship, resulting in increased interest in science at a rate of 3x that of non 4-H peers. Projects such as livestock, conservation, and veterinary science allow 4-H youth to practice: wise use of resources, decision making, goal setting, marketable skills and self – motivation.  Compared to non 4-H youth, 4-H youth are 70% more likely to participate in science, engineering, or computer technology programs and 40% more likely to pursue science, engineering or computer technology courses or careers.	Volunteers create, support and are part of the 4-H community. Missouri 4-H volunteers average 100 hours per year according to survey work.  Best of all these adults serve as mentors for our youth helping them transition into adult hood.  Missouri 4-H members are twice as likely to have been on a college campus then their non 4-H peers. MU is the campus frequented the most. Being on a campus is a predictor of youth going on to higher education. Youth who earn a bachelor's degree, increase annual earnings by \$2.01 million over their lifetime (Porter,2003).

## **Agronomic Programs**

## Wayne Flanary Agronomy Specialist

Agronomic Programs – Wayne Flanary					
Programs	Topic	What Did They Learn?	What Action Did Participants Take or How Did They Benefit?	How Does This Work Make The County and Missouri Better?	
The value of all crops including row crop, forages and commercial horticulture is \$406 million in Holt, Atchison, Andrew, Nodaway, Clinton, Buchanan, DeKalb. To maintain a competitive, viable agriculture requires the latest research, education and resources to continue its growth.  Management of Genetically Improved Crops  Mo Crop Management Systems  Plant Protection  Nutrient Management Planning  Forage Production and Management	Crop management  Forage management  Fertilizer management  Pest management  The agronomic programming focused on timely delivery of crop management information and research to the seven counties in Northwest Region. The programming effort is accomplished through media such as radio, newspaper and newsletters. Other methods include meetings, research and demonstration plots and directly answering grower's questions.	<ul> <li>New precision ag technology and biotechnology and how technology fits into a grower's operation</li> <li>New hybrids and varieties through our testing program</li> <li>Improved weed control research and teaching</li> <li>New weed, insect, and disease pests that potentially can attack crops and utilizing our pest monitoring program</li> <li>Product evaluation to determine if the product is effective and how to adopt and utilize this in a grower's operation</li> <li>Pesticide safety</li> <li>Product costs and determining their cost effectiveness</li> <li>Choosing and applying fertilizers</li> </ul>	Formal surveys of growers' attitudes to teaching in formal meetings as follows:  During the last eight years, the value of the agronomic meetings rated a 4.25 on a scale of 1 to 5 with 5 being excellent and 1 being poor.  Also, data summarized over past eight years indicated that growers would recommend this meeting to other growers rated a 4.38 average on a scale of 1 to 5 with 5 being excellent and 1 being poor.  As to speaker being knowledgeable, data summarized was 4.58 on the same scale.  Agronomic programs vary with methods of delivery. The result is an action or a decision and knowledge is gained by growers. Also, growers request what the research indicates, what are the advantages and disadvantages of using a product, a strategy, or sometimes how to address a situation or problem.	Winter Ag Update meetings focus on critical topics for row crop and livestock producers enabling them to be competitive.  Private applicator training provides growers with the knowledge to apply pesticides safely while protecting the environment.  Cooperation with commodity groups helps growers expand markets and produce food not only locally but also globally.  Certified crop adviser meetings provide technical information to crop advisers resulting in scientifically sound recommendations when they work with area growers.  Graves Chapple Research Center and Hundley-Whale Research Center provides the latest research to help growers remain competitive and provide an economic driver for northwest Missouri.  As world population continues to increase, the need for food production continues to grow. It is critical to continue to increase crop yields while maintaining competitiveness to increase food production in an environmentally responsible manner.	

Family Nutrition Program
FNP provides information on nutrition, food safety, and physical activity for lifelong health and fitness.

**Nutrition Program Associates:** Gina Ripley and Sue Robison

Nutrition 1 Togram Associates. Ona Ripicy and Suc Robison				
Number of Andrew County Learners	What Did They Learn?	What Action Did They Take?	How Does This Make Andrew County and Missouri Better?	
University of Missouri Extension's Family Nutrition Program (FNP) reached 1504 participants directly and 543 indirectly with nutrition education in Andrew County during 2017 a significant percentage of which were low income. FNP provides information on nutrition, food safety, and physical activity for lifelong health and fitness by working with qualifying schools, community groups and agencies.	Youth from Pre-school to 8th grade learned through kid-friendly, hands-on lessons and activities. Activities include opportunities for tastetesting healthy foods and practicing skills that lead to good health. Education for adults also includes nutrition, food safety, and physical activity, as well as food resource management.  Nutrition Program Associate Gina Ripley  Nutrition Program Associate Sue Robison	Nutrition Program Associates (NPA's) go into schools and other grant eligible locations and interact with community members to help them make healthier choices and build healthy habits. They see the difference the program makes in people's lives	The Family Nutrition Program (FNP) brought \$9,681, 129.00 federal funds to the state of Missouri. These funds were used to provide nutrition education to 838,295 Supplemental Nutrition Assistance Program recipients and eligible citizens of Missouri. There were 3,831,270 educational contacts. This year we had 3,064,781 indirect educational contacts. Indirect contacts are reached through newsletters, health fairs, food pantries and the Show Me Nutrition help line. 2047 of these participants reside in Andrew County. Participants in FNP become more aware of nutrition, make healthier meal and snack choices, eat breakfast more often, are more willing to try new foods, increase their physical activity and in general make healthier food choices. Those who practice healthy eating and activity behaviors are more likely to enjoy a high quality of life as an adult and into old age. A healthy labor force is critical to attracting and keeping jobs in Missouri. In addition, this important programming effort serves to reduce healthcare costs over the participant's lifetime, saving taxpayers money in reduced public healthcare benefits and insurance premiums.	

## **Beef and Forage Production Education**

### Livestock Specialist Jim Humphrey

Serving: Andrew, Buchanan, Caldwell, Clinton, DeKalb and Ray counties in Northwest Missouri

			and Ray count	ies in Northwest Missouri	A THE A STATE OF
	Number of Learners	Торіс	What Did They Learn?	How Did Participants Benefit?	How Does This Work Make Our Counties and Missouri Better?
	200 plus Cattle and Forage Producers	In total approximately 400 hours were spent in learning beef cattle production, forage production and utilization, nutrition management and ration balancing by area participants.	Strategies to optimize beef production and improve costs on their operations, including managing feedstuffs, pregnancy checking females, documenting individual animal performance throughout the entire production phase, including what determines value on each animal.	Beef and forage producers are better prepared to make informed decisions on their operations, regarding animal health, genetic selection, nutrition, as well as income and expenses that affect the bottom-line for their respective operations. Including reducing feed wastage and marketing low or non-productive animals in a more-timely manner.  Furthermore individual feeding programs were designed based on feedstuff availability, nutritional analysis and cost structure for each operations animal's production stage requirements.	Many beef producers contacting me are looking for answers to questions specific to their operation. By taking a total quality management approach for each operation we can help producers get the information and resources they need in a timely manner to improve the bottom line for their operations. When we support beef and forage production in our area, participants learn high quality unbiased research based production strategies which result in increased success for producers in reaching their production and financial goals. By maintaining
		HART	Strategies to best determine the value of their forages, the variation in quality of forages and how best to manage these feedstuffs, while maintaining productivity, maximizing nutrient utilization, while minimizing soil and nutrient losses and other negative impacts on the environment.		or improving soil health and water quality through better distribution of nutrients on our forage and beef cattle operations, we ensure future generations will have safe and plentiful natural resources.  With over 80,000 head of beef cattle in the area a viable agriculture economy has a positive impact on our area and plays a key role in our local, regional, state, national and world economies.
	450 plus Youth participants	In total approximately 700 hours were spent by area youths learning conservation, water cycles and good agricultural production practices.	Strategies area beef producers are using to optimize their operations while minimizing soil and nutrient losses and other negative impacts on the environment.	By having a better understanding of the research-based information and good production practices producers utilize on their operations, youths will be better able to understand why they as producers themselves need to be good stewards of their land and resources.	Well-informed youths are better prepared to make good management decisions based on research-based results. Youths are our future and provide great opportunities for our area.

## **Andrew County**

#### UM System Statewide Footprint

#### Economic and community development highlights

 Business development specialists worked with small businesses and entrepreneurs statewide to create 8,149 jobs.

For every dollar invested in University of Missouri Extension \$11 of public value is returned; generating \$945 million in direct and economic benefit to Missouri in 2016.

 Between FY2011 and FY2016, UM System brought Missouri more than \$1.1 billion in federal and private research funds, funded primarily from outside the state but spent within the state.

In 2017, the university was issued 49 patents and filed 74 patent applications.

 In 2017, the UM System construction projects resulted in a total investment in the state of \$136.7 million.

In FY 2017, Missouri Telehealth Network brought the expertise of University of Missouri Health Care physicians to underserved areas — 2,270 patient consults in 42 counties.

#### Education and training provided

42,576 police, fire fighters, nurses, and doctors attending continuing education

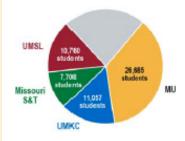

Agriculture and natural resource programs served 94,830 farmers and related businesses

190,300 youths served in 4-H clubs, schools, camps and other programs

#### Education highlights

77% of the UM System's 72,877 students receive some financial aid totaling \$910.6 million.

- UM System's MOREnet (Missouri Research and Education Network) provides internet connectivity, access, support and training to 59 higher education institutions (267,000 students), 502 K-12 school districts (828,900 students) and 116 public libraries (serving nearly 5 million Missourians) in 2016.
- UM System awarded 54% of Missouri's 32,575 bachelor's or higher degrees from four-year public institutions in academic year 2015-2016.
- In 2017, UM System's \$34.5 million in National Science Foundation (NSF) grants represented 97% of all NSF grants made to Missouri public universities.

The cost of supporting full-time students in the UM System is 27% less than peer institutions.

#### Supporting the University of Missouri is an investment in the future of Missouri.

The university advances Missouri citizens and communities through its mission of teaching, research, public service, and economic development across our four campuses and University of Missouri Extension.

Prepared in December 2017, based on the best available and most recent data. ## MERIDITH BERRY VITA TAX PREPARATION

Number of Andrew County Participants	Total dollars returned from federal and Missouri refunds.	What Did They Learn?	What Action Did They Take?	How Does This Work Make Andrew County and Missouri Better?
22 participants representing 20 households	A total of \$8,268 was returned in federal tax and \$10,016 in state refunds to Andrew County residents.	<ul> <li>Importance of retirement savings</li> <li>Savings Credit</li> <li>Other tax credits</li> <li>Lowering tax liabilities</li> <li>Consequences of bankruptcy</li> <li>Student loans and paying them back</li> <li>Health insurance mandate</li> </ul>	Most clients are repeat customers or referrels from past clients.  Many are clients of the Public Adminstrator.  Refunds are used for some basic needs such clothing.	In addition to the income and education, an average o \$90 per return was saved by having taxes prepared by University of Missouri Extension. Regionally, federal and state tax forms were filed for more than 300 households. In addition to Missouri tax returns, state returns for seven other states were prepared. Supporting extension saved low income families the cos of a tax preparer and brough money to the area in refunde earned income credit, child tax credits, and other tax credit benefits. According to the IRS, regionally the VITA program had an economic impact of over 2 million dollars to northwest Missouri.

Supporting the University of Missouri is an investment in the future of Missouri.

The university advances Missouri citizens and communities through its mission of teaching, research, public service, and economic development across our four campuses and University of Missouri Extension.
